

## **NOTES FOR THE FINAL EXAM-- FALL 2013**

The final exam will be held in the normal classroom from 9 - 11 am on Tuesday, Dec. 10. As with all other tests this term, neither calculators nor any other electronic devices will be allowed. You will have the full two hours to complete the exam.

The exam will draw from all material covered in class and assigned for reading throughout the semester with the exception of section 7.6 (Bose - Einstein condensation) (but including material in sections 7.3 and 7.4).

Your exam will include a set of equations and results, so again, there is no need to memorize long lists of equations. However, you will need to know the meanings of variables and under what conditions the equations apply.

Office hours for the exam will be :

Friday from 10 : 00 - 12 : 00 and 1 : 00 - 3 : 00 in Cudahy 404

Monday from 3 : 00 - 5 : 00 in Cudahy 404
